Dear Commissioner,

I'm not sure why it is that my government that should be acting on the behalf of its population has so blindly walk-ed into the-court of big business that manufacture chemicals and alter genes, This is about my right as a consumer to be able to make the choice as to whether I eat Genetically engineered foods or not. Its also about my right as an organic farmer t-o be able to grow out uncontaminated species of edible foods.

I want to see testing of GE foods. Some people are allergic and others may see long term immunological problems.

Have you reviewed the environmental damage GMOs are having, and will continue to have?

I want to see some kind of labeling that indicates- whether there are GE ingredients in consumer products and whether the absense of GE foods cannot be guaranteed. i.e. "this food contains genetically modified crops" and "THIS FOOD MAY CONTAIN GENETICALLY ENGINEERED PRODUCTS".

I'm mad as hell about how in bed you all have gotten with corporations. Just who are you serving!
